Kappa Psi Celebrates Fall In Style

By Kendra Mueller

The semester is halfway over and Kappa Psi has been very busy. The month of October is always an exciting one. The chapter began pledging, celebrated Halloween, and had its Fall Province meeting in Morgantown, WV. We began the month with our induction ceremony where we welcomed 33 new pledges to the fraternity. We would like to congratulate the FPC '09 Members:

Hannah Allegretto, Tony Amos, Allison As-tor, Alexa Benner, Luke Berenbrok, Natalie Capozzolo, Timmy Cook, Hannah Duttenhoefer, Chelsea Fitzgerald, Courtney Herman, Nick Hunsinger, Jessica Janda, Julie Jean, Desiree Kosmisky, Allie Lazar, Alicia Lichvar, Zarah Mayewski, Elizabeth McCartney, Lindsay McCartney, Laura Mincemoyer, Brian Park, Kajal Patel, Theresa Penatzer, Sarah Rindfuss, Maggie Ryan, Ruth Seiffert, Josh Titus, Sam Turk, Joey Vernon, Elyse Weitzman, Kaitlyn You, Kayleigh Ziska

Kappa Psi took the time to celebrate fall with a

bobbing for apples competition at our house. Although the water was cold, the brothers still dunked their heads to take part in a great fall festivity. We also took our annual trip to Fright Farm in Connellsville, PA to celebrate Halloween as a fraternity. Only one car got lost on the way, but we were all able to gather at our VIP tent for s'mores and other treats before taking a hayride to the haunted house. The trip is always an exciting one full of scary memories and lasting bonds! The end of October brought a Halloween celebration in Morgantown, WV as many brothers made the short trip south for our fall Province meeting. We enjoyed a weekend of getting to know brothers from other schools in our Province and taking part in meetings to decide important fraternity matters. The chapter had a great showing in Morgantown and couldn't wait for the announcement of Chapter of the Year. Everyone will have to wait to hear if Beta Kappa won the honor, as the announcement will come after this article is printed!

Kappa Psi wishes everyone an exciting end to the semester. We can't wait to see what else is in store for us the rest of the year!

APhA-ASP Gears Up for MRM and More

By Alexa Ray

Midterms are winding down and the end of the semester is in sight...finally! As we face one more month of classes before finals start to take their toll, I hope you will consider taking advantage of some of the great opportunities APhA-ASP is bringing to our school.

A group of Pitt students will be traveling to Rutgers University November 6-8th for the Region 2 Midyear Regional Meeting of APhA-ASP. This regional meeting always proves to be a source of great ideas for our ASP chapter as well as an opportunity for successful networking with members of other ASP chapters in our region. We hope that some of the innovative ideas we discover at Rutgers will prove to be valuable to our chapter in the spring semester and the coming year.

The annual Career Expo at the School of Pharmacy will take place Wednesday, November 11th from 10:00 a.m. to 4:00 p.m. and will provide students from all classes with the chance to meet representatives of many companies, hospitals and residency programs and learn more

about post-graduation opportunities. Students interested in company interviews can sign up for afternoon time slots, while those just interested in mingling with company representatives can visit booths during the expo. Please contact me with any questions.

Last but not least, Pharmacy Weeks will take place January 11th-20th, 2010! There are a lot of great events in the works, including the annual No-Talent Talent Show, the PLS Charity Auction, KY/PDC football game, Tucci Lecture, and of course the ASP Formal. Our Social Chair, Natalie Pappas, is hard at work planning for the two weeks of great events. If your organization wants to participate in Pharmacy Weeks by planning an event, contact Natalie at natalie.l.pappas@gmail.com.

APhA-ASP wishes you a happy and successful end to the semester, and we encourage you to get involved in all of the great student opportunities throughout the school. If you have any questions about ASP activities, projects, or events throughout the year, feel free to get in touch with any of the ASP Executive Board Members.

PLS Updates

By Anastasia Elmiger

PLS is pleased to be participating in the national PLS challenge to implement a project that smoothes the transition from being student leader to a professional. PLS is currently generating ideas and is excited for the possibilities!

The P1 mentoring program is still going strong. P2s will also be included in the next event, where P3 PLS members will instruct the underclassmen on how to use and develop their portfolios.

The Annual PLS Auction will be held Thursday January 14, 2010 at the Wyndam Hotel in Oakland. PLS is thrilled to have Dr. Fabian and Dr. Benedict as co-Master of Ceremonies. Stay tuned for more details!

PLS would also like to thank Rho Chi for selecting an excellent speaker for the second Professional Lecture Series. The next lecture series will be held on November 18th. As always, lunch will be provided.

Raise Awareness for Diabetes—Wear Light Blue on November 13!

By Summer Stairs

The world is raising awareness about diabetes Saturday, November 14th. Here at the School of Pharmacy we will be echoing the world movement by wearing the designated diabetes color of light blue on Friday, November 13th. This day will serve as the kick-off for the ASP Patient Care Committee's Operation Diabetes spring semester project.

The project this year will target faculty and staff from lower campus. Pharmacy students will be working closely with program participants to help prevent diabetes and other related diseases. As future pharmacists,

you will help motivate, educate, and support faculty to take a step towards better health. Be on the lookout for ways to get involved.

I challenge the entire pharmacy school faculty, staff, and students to wear a light blue shirt on Friday, November 13th. All students will receive a prize, but as an extra incentive, the class wearing the most blue will be rewarded with breakfast on Monday, November 16th. Mem-

bers of the ASP Patient Care Committee will be coming into each class at 9am to take a count, so make sure to be in class if you want to help your class win.

Viruses and Cancer: What's the Link?

By: Gerard Mascara & Eric Gardner
Rho Chi Society, Alpha Omicron
Chapter

Note: This is the inaugural Rho Chi entry into the Infectious Diseases Blog. Please visit the blog website to post commentary on this and other blog entries!

<http://rxweb.pharmacy.pitt.edu/groups/infectiousdiseasesblog/blog/>

Today, Gardasil® (Merck) is routinely administered to young women to prevent infection from human papilloma virus (HPV). Pitt pharmacy students fortunate enough to see Dr. Schiff's vivid photos of acute infection with HPV may feel that prevention of these disfiguring genital warts be reason enough to initiate a widespread vaccination campaign against the virus. Yet we know the vaccine's true indication is to prevent the leading cause of cervical cancer... but what on earth do viruses have to do with cancer?

At the University of Pittsburgh School of Pharmacy, one of the major historical links between viruses and cancer hits very close to home (yes, we sometimes do feel as if we live in Salk hall).

The Salk inactivated polio vaccine, which was hugely successful in preventing polio, was found to be contaminated with Simian Virus 40 (SV40) several years after it had already been administered to millions of Americans. The further observation that SV40, a "monkey virus" which infected the rhesus kidney cells in which the vaccine was produced, caused transformation of several nonhuman cell lines into cancerous cells caused great alarm and led to intense study of the link between cancer and the virus, and the possible ramifications of exposure.

While the jury is still out (and most likely is out for good) on whether or not this contamination led to an increased rate of cancer in exposed individuals, scientists' intense scrutiny of the virus contributed to the discovery of one of the archetypical tumor suppressors, the retinoblastoma (Rb) protein.

The SV40 viral protein dubbed "large T antigen" inactivates Rb, thereby mitigating its critical role in cell cycle regulation. Loss of Rb-mediated cell cycle control can lead to enhanced proliferation and, when combined with additional cumulative genetic or epigenetic changes, can lead to overt cancer.

While issues of infectivity and transmissibility may hamper SV40's contribution to the development of *human* cancers, the role of HPV in causing human cervical cancer has been established with much more certainty.

Interestingly, HPV also encodes a viral protein named E7 which inactivates the Rb tumor suppressor and gives infected cells a growth advantage, ultimately leading to cervical cancer in a fraction of infected individuals.

Thus, while a vaccine to "prevent all cancers," may be unrealistic at this point in time, when we consider the multitude of ways cancers emerge in the human body, it can be appreciated that we have been able to develop several vaccines against specific, known etiologic agents.

A detailed counseling session on the importance of mitigation of Rb tumor suppressor function in the biology of cervical cancer would not be an effective way to convince a teenage girl to receive the vaccine; however, we do feel that an appreciation of some key

Electron micrograph of human papillomavirus (HPV).
Courtesy of NCI. 1986.

historical events leading to the discovery of the Rb tumor suppressor and the molecular link between HPV and cervical cancer is valuable information for all pharmacists.

Other than discussing molecular biology, what strategies would you employ to convince women to receive the HPV vaccine? On another note, contamination of the polio vaccine led to a great deal of negative press about the safety of vaccinations. In more recent times, worries about safety ranging from autism to Guillain-Barré Syndrome have caused patients and their caregivers to refuse vaccination.

How would you try to convince these patients that the benefits of vaccination outweigh the potential risks?

¹Fisher SG, Weber L, Carbone M. Cancer risk associated with simian virus 40 contaminated polio vaccine. *Anticancer Res.* 1999;19(3B):2173-80.

Lambda Kappa Sigma Welcomes New Members

By Hoi Yee Lung

First and foremost, the Delta Chapter of Lambda Kappa Sigma would like to welcome our new members: Sarah Brinley, Kristen James, Maria Kane, Indrani Kar, Nicole Kovacic, Heather Lezanic, Kelly Luzi, Erika Morgan, Jenn Plank, Glenna Shutzberg, Kailey Troutman and Katrina Zook! We are extremely happy to have this enthusiastic group of girls join our organization and to begin the busy months ahead.

Beginning the new member period at the Pinning Ceremony on October 7th, LKS has planned many activities to unite new members and sisters, including the Family Dinner held at Salk Hall. In the spirit of sisterhood, the dinner including pasta, salad and desserts were served family style and were shared over conversations and sister interviews. The annual scavenger hunt held on October 21st allowed sisters to team up and drive around the Southside, Waterfront and Oakland collecting as many objects and group pictures as possible. All the clever riddles and clues were related to the city and the School of Pharmacy. Everyone had an amazing time in the friendly competition and congratulations to the winning team of P1s and P2s! Over the next month, there will also be several Sister Lunches so that both current and future sisters may become more acquainted with one another.

The Founder's Day Ceremony was also held on Sunday, October 18th. This was a great opportunity for the sisters to

share in a very special ceremony to commemorate our organizations and its roots. The event featured Heather Derby, an LKS alumna and current UPMC pharmacist, as well as a potluck dinner.

In addition to the professional event series, the sisters focused on the importance of clean communities by participating in the "Adopt-a-block" program in Oakland on Saturday, October 17th and 24th. The Delta Chapter is getting involved with the Greater Pittsburgh Community Food Bank to help gather food and funds and to volunteer at soup kitchens to feed needy families. Along with PDC, we will be hosting a class competition to collect the most non-perishable items until November 13th. Collection bins will be in the PCLC and on the 9th floor, and as an extra motivation, the winning class will receive a bagel breakfast!

The annual LKS clothing sale and Yankee Candle® sale just drew to a close and both were a huge success as always. Thank you to everyone who participated in our

fundraisers!

We will be collaborating with Duquesne University over the next year to plan LKS's 2010 Biennial Convention hosted here in Pittsburgh! We are working hard to make the convention a memorable experience and to introduce national and international sisters to the City of Champions. Also, the sisters are looking forward to the annual LKS/PDC formal which will be held on November 6th at the Pittsburgh Athletic Association. This event is always one of the highlights of the semester!

From all of us at LKS, have a happy and safe Thanksgiving!

A Day in the Life...

...of a P4 on Rotation at the American Society of Health-System Pharmacists (ASHP)

By Christina Martin

In September 2009, I had a unique opportunity to complete a rotation at the American Society of Health-System Pharmacists Headquarters in Bethesda, MD. Bethesda is the first metro stop on the Red Line outside of Washington, D.C. This elective rotation was in national organization management. My experience was focused in the Pharmacy Student Forum (PSF) and working with my preceptor, Marni Lun, who is the Director of the PSF.

I was given two projects to work on during my rotation. The first was to create three PowerPoint presentations for Student Societies of Health-System Pharmacy (SSHP) to use. The second was to revise the content and

appeal of the SSHP web pages. In between working on the projects and collaborating with the web designers, I attended the weekly staff meetings and Office of Member Relations meetings. I even led my own meeting with the Student Taskforce Group. While at ASHP, I had the opportunity to meet influential persons like Richard Talley (Editor-in-Chief of AJHP), Dr. Henri Manasse (Executive VP and CEO of ASHP), and Lynnae Mahaney (ASHP President).

On the last day of my rotation, I participated in Legislative Day on Capitol Hill. I joined other ASHP-member pharmacists from Pennsylvania to meet with representatives from the offices of Senator Bob Casey, Jr. and Senator Arlen

Specter. At these appointments, we advocated for three issues: (1) Recognition of pharmacists as non-physician providers, (2) Restoration of funding for PGY-2 residencies and (3) Inclusion of pharmacists in Loan Forgiveness. I anticipate completing a 2 year Pharmacy Administration/MS Residency program, so advocating for the restoration of PGY-2 funding is near and dear to my heart.

You can see the fruits of my rotation labor at www.ashp.org/sshp. If you have an interest in pharmacy management, or want to get involved with ASHP as a student, feel free to contact me, Christina Martin, cym2@pitt.edu. Good luck with the rest of the semester!

IPSF Updates

By Alexa Ray

IPSF is excited to announce our spring semester Medical Spanish classes! These classes are open to any pharmacy students interested in learning some basic conversational Spanish, as well as to those with previous experience wishing to re-familiarize themselves with the language. They will be one-hour-long classes, held once weekly over a six-week period in January and February 2010 (exact dates, times, and location will be forthcoming). Students who are not currently included on the IPSF mailing list and are interested in more information should e-mail me at alexajray@gmail.com and I will provide you with more information as it becomes available.

As for the rest of the fall semester, we are proud to sponsor two exciting upcoming events. On Tuesday November 10th, P-4 Yardlee Kauffman will be visiting the school for a lunch lecture hosted by IPSF in 402 Salk, during which she will be sharing her experience spending five

weeks in Ireland as an elective P-4 rotation. Any students interested in learning about pharmacy abroad, setting up international P-4 rotations, or just hearing about a unique experience are encouraged to attend! Light refreshments will be provided.

On Tuesday, December 1st, we will be collaborating with SNPhA to host new clinical faculty member Dr. Ryan Shields for a World AIDS Day celebration and fundraiser. A generous lunch will be provided for a suggested donation, and attendees will learn about the medical, personal, and social implications of the worldwide HIV/AIDS epidemic from this engaging speaker.

The IPSF meeting will be on Friday, November 20th from 12-1 in the PCLC. Students interested in helping with the Medical Spanish classes, planning a Pharmacy Weeks event, or just getting involved for the spring semester are invited! Feel free to e-mail me if you have questions about any of IPSF's activities or projects.

AMCP News

By Nick Casale

AMCP is excited about its second "Open House" for career opportunities in managed care on Thursday, November 19th between 12:00pm-1:00pm in room 457 Salk Hall. Lunch will be provided for all those that attend. Companies that will be on hand will include: CVS/Caremark, UPMC Health Plan, Highmark, Gateway, and many more! Please come out to the event to hear what it is like in the day in the life of a managed care pharmacist. There will be many opportunities to make some connections for internships and jobs!

AMCP's Annual P&T competition will also take place in the middle of the spring semester. If you want to form a team or have interest in the competition and what it involves, I strongly recommend the P&T Competition information session on Thursday, December 3rd. Please look on the Student Portal for room information. If you win the competition at Pitt, you will be in the running to place nationally. The Top 8 nationally receive travel grants to the AMCP National Convention in San Diego, CA this April. I hope to see everyone at the events!

SNPhA Updates

By Ijeoma L. Odigwe

On October 22, 2009, SNPhA held a Lower Campus General Body meeting with guest speaker, Dr. Sharon Conner, PharmD. Dr. Conner has become an active leader for various community service activities and projects found on campus and in our Pittsburgh community. Some of the service projects that she presented and urged Pitt undergraduate and graduate students to take part in included the "Health Care for the Homeless Program," the "Program for Health Care to Underserved Populations," Operation Safety Net, and volunteer/outreach opportunities at the North Side Christian Health Center.

Dr. Conner specializes in providing medical aid and representation for the populations in society that generally lack most forms of health care due to financial difficulties and other restraining circumstances in their lives. Her presentation stressed on how vital

it was for students like ourselves to take action in helping those people that are in need of medical attention. Furthermore, she stressed on the need for volunteers in many of the programs that she was currently initiating.

That being said, SNPhA urges you to do your part in serving the community.

There are countless service opportunities that are available within the Pittsburgh area that are in need of your help. It is never too late to volunteer, and not only do you gain the satisfaction of serving others, but you ultimately bring aid to many people that are in dire need of it. Through our major service com-

mittees, SNPhA too is taking strides to serve our public and those in need. Good luck in your service, may you find many ways to help our society in the future.

Updates from Your Class Presidents....

P1 Class Updates

By Alicia Lichvar

The P1 class is currently preparing for a wave of exams, a bombardment of busy-work assignments, and the slowly approaching Thanksgiving Break. While the dread of another set of exams looms, our class has started rotating through Falk Pharmacy as well as several other community sites within the area to gain a basic knowledge of how pharmacies operate.

While the first semester has been busy, we have initiated some promising fundraisers for the class. First, we are having a clothing sale that includes a t-shirt designed by the P1's very own Jeffrey Moyle, a throw-back classic Pitt Pharmacy baseball shirt, and a fleece embroidered half-zip. In addition, the P1 class is working at Steelers' game December 20th for their second slated fundraiser of the year, which promises to be a memorable, worthwhile experience!

In other news, the P1 class recently participated in American Pharmacy Educator Week

by attending several faculty presentations and activities that showcase the variety and potential within the profession of pharmacy. With Thanksgiving several weeks away, it appears that everything appears to be running smoothly for our first semester!

P2 Class Updates

By Adam Martin

P2s are coming out of our second major wave of examinations, and looking forward to Thanksgiving with family & friends.

P3 Class Updates

Mike Smith

"24 days for some (19 for others) and a few finals. Doesn't sound like much, and with rotations on everyone's mind, we are definitely seeing the light at the end of the tunnel. Off rotation selection is soon upon us, with electives next, followed by the rotation spin early next semester. P3 life is good."

P4 Class Updates

By Katherine Radzevick

With rotation #5 coming to a close and eight students completing their PharmD Seminar presentations each week of the fall semester, the P4 students are finally realizing how quickly the last year of pharmacy school flies by. The main topics of discussion among classmates concern career and after-graduation plans, which provides a great basis for the need our novel upcoming event. October 30th marks the date for the first ever "Mock Reception." This is a venue for the P4 students to learn tips on how to interview, network and feel comfortable introducing themselves in a reception-style setting. We are looking forward to this outstanding opportunity to interact with faculty and alumni and practice this valuable skill set before the upcoming Career Expo in November and Midyear in Las Vegas in December.

Rho Chi Updates

By Morgan Adams

Rho Chi members continued to stay busy through the month of October with service projects. This month's health talk at the Salvation Army featured hypertension, and next month's topic has been set as hepatitis. Additionally, the Rho Chi tutoring program for P1 and P2 students continued throughout the month. Contact Ashley (amt37@pitt.edu) or Eric (eeg7@pitt.edu) if you are still interested in the tutoring services. Mark your calendars for the Rho Chi and ASDA (American Student Dental Association) blood drive to be held on Wednesday, December 2nd from 11-5 in the PCLC. Anyone who donates will be entered in a raffle for a gift card!

This month, Rho Chi members Jerry and Eric began the organization's monthly contributions to the infectious disease blog set up by Dr. Po-

toski. Look for articles each month in Pitt capsule and on the blog (<http://rxweb.pharmacy.pitt.edu/groups/infectiousdiseasesblog/blog/>).

On Wednesday, October 21st, Rho Chi sponsored a lunch for the Professional Lecture Series with PLS that featured Zachary Marcum, PharmD, a T32 Postdoctorate Geriatric Fellow, Division of Geriatric Medicine, Master in translational research, who highlighted fellowships, pharmacy residencies and the challenges of geriatric research. Thank you to all that attended!

Finally, Rho Chi would like to thank everyone for supporting Rho Chi through the purchase of business cards and lab cards. These will be available for distribution in the upcoming weeks.

Rho Chi Student of the Month—Michael Smith

Michael Smith—P3

Rho Chi would like to congratulate Mike Smith for being selected as the October Student of the Month. Mike was nominated by his peers because he is a dedicated member of many school organizations and because he is also committed to the growth of our profession.

Mike is involved in several professional

organizations including APhA-ASP, Kappa Psi, PPA, PSHP, and PLS, where he serves as the current president. He is also a part of the Information Technology Committee and the Dean's Advisory Board. Along with being a member of all of these organizations and groups, Mike has also served as the president (a.k.a. "Class Captain") for the Class of 2011 for all three years, keeping his fellow classmates up-to-date with his traditional weekly emails, while saving many in the process. Throughout the first two and a half years of his pharmacy education, he has proved to be a great representative for both the P3 class and the School itself. Mike is a great example of what it means to be a professional student pharmacist, so if you see him in the hallways of Salk, be sure to congratulate Mike on being selected as October's Student of the Month.

To nominate a fellow student or for questions about the SotM, please e-mail wec15@pitt.edu

PSHP News

By Taylor Miller

Residencies, Residencies, Residencies...

In the spirit of residencies, and in preparation for WPSHP's fall residency showcase in November and ASHP's national residency showcase in December, residencies are PSHP's focus for the month. With an increasingly greater emphasis being placed on completing a residency, appropriate preparation is more critical than ever. Our November 3 meeting was devoted entirely to the topic of residencies, with a panel of pharmacy practice residents and pharmacy management residents joining our meeting to discuss various elements of their residency experience.

For students interested in learning more about residencies in general, PSHP would encourage you to attend WPSHP's pharmacy residency showcase on Thursday, November 5 from 4:30-6:30 PM at Duquesne University. Modeled after ASHP's national residency showcase, WPSHP's event will have representatives from over 20 "local" residency programs, including representatives from Pennsylvania, Ohio, West Virginia, and Virginia. This event will be an opportunity to gather information and learn about several residency programs as well as network with current preceptors and/or residents from these locations. If you want to learn more about various residency programs but are unable to make it to the national residency showcase at ASHP's Midyear Clinical Meeting, this local residency showcase is the place for you! Contact Taylor (tjm33@pitt.edu) or Morgan (mba13@pitt.edu) for more information.

MARK YOUR CALENDARS!: PSHP will be hosting our first Lunch & Learn session of the year on Tuesday, November 17 at noon in room 457. Carol Hurley and Gary McGovern of Hurley Associates will be presenting a lecture on a financial topic of particular interest to our current and future *financial* health. Lunch will be provided! Also, join us for our next organizational meeting on Tuesday, December 1st at noon in the PCLC. Rachel Anderson, a clinical pharmacist that practices in a unique community-based patient care setting will be joining us to discuss a unique area of pharmacy practice under the health-system umbrella.
